Dear <Person name> at <Company name>

With **over 10 years of experience in the IT industry** in System analysis, Software development, System Design and Architecture, I am confident I will be a great fit for the **Software Engineer** role at <Company name>.

My experience has provided me with the innovative and technical skills necessary to successfully provide <Company name> with multifaceted technical solutions across a wide range of software platforms.

At my current company (<Current company name>), I am responsible for leading the design and development of a **multi tenant application using Python, Django, DRF (Django Rest Framework), jQuery and Vue.js** for small - medium sized ISPs of Germany that is expected to serve **over one million end users**.

Designed, developed and managed a full fledged microservice Dashboard application for <client 1>, <client 2>, with over 20 million end users where the client can analyse the statistics, send outage notifications and manage customer queries.

The following is a snapshot of my broader technical skills:

- Agile project management
- Full Stack web application development
- Enterprise level web application design and development
- Single tenant and multi tenant application design and development

It would be a pleasure to know more about <Company name> needs, and I would welcome the chance to provide further insight into my knowledge of project management, technical abilities, personal attributes, and track record of success in building revenue generating web technologies compatible across multiple platforms, browsers and devices.

Thank you for considering my candidacy for this position. I hope to hear from you soon to schedule an interview.
